

# Childhood Lead Poisoning

Notes:

1. Only cities with 500 or more children tested in the previous year are listed.
2. The city columns do not have totals since not all of the cities are listed.
3. Chart contains preliminary data and may be updated quarterly.
4. ug/dL = a measurement tool; micrograms per deciliter of blood

The chart below demonstrates the number of children screened and determined to have elevated blood lead levels during 2007:

City Name	Total Children Screened (0 - 72 months)	Under 10 ug/dL	10 - 14 ug/dL	15 - 19 ug/dL	20 - 24 ug/dL	25 ug/dL and over	Total EBLs
