Safety Net Dental Care Programs in Ohio

Safety net dental care programs provide clinical dental services and generally are operated by local health departments, community health centers, hospitals, and other organizations that serve the community. Ohio has approximately 180 programs that provide basic dental services.

Safety net dental care programs participate in Medicaid and Medicaid managed care plans and offer sliding fee schedules, reduced fees, or free care to clients who are uninsured and have low incomes.

This brochure lists **safety net dental clinics** in Ohio alphabetically by county and city and serves as a quick reference for making referrals to these programs. The majority of Ohio’s safety net dental clinics provide basic dental care, which includes examinations, X-rays, fillings, extractions, partials, dentures, root canals, cleanings, and emergency dental care.* A few clinics may offer oral surgery only (extractions), while some clinics only provide dental services to a specific population (homeless, children, etc.).

**Not all clinics provide all of these services. Clients should call individual programs for details.*

To view a list of all **safety net dental clinics** that includes more detailed information, such as the clinic address, types of services provided, and population served, [click here](#). Check the [Oral Health Program website](#) for additional dental care resources.

Revised April 2025.
