

Childhood Lead Poisoning

Notes:

1. Only cities with 500 or more children tested in 2009 are listed.
2. The city columns do not have totals since not all of the cities are listed.
3. Elevated blood lead levels (EBLLs, shown in red) are those at or above 10 µg/dL, the level of concern for children (determined by the CDC)
4. Elevated lead levels reflect the first confirmed, elevated test for the year.
5. Chart contains preliminary data and may be updated quarterly.
6. ug/dL = a measurement tool; micrograms per deciliter of blood

City Name	Total Children Screened (0 - 72 months)	Confirmed Elevated Blood Lead Levels (EBLLs)						Total EBLLs
		1 - 4 ug/dL	5 - 9 ug/dL	10 - 14 ug/dL	15 - 19 ug/dL	20 - 24 ug/dL	25 ug/dL and over
