John R. Kasich/Governor

Richard Hodges/Director of Health

DIRECTOR'S JOURNAL ENTRY APPROVAL OF CONSORTIUM OF INSTITUTES OF DECENTRALIZED WASTEWATER TREATMENT'S NATIONAL OPERATION AND MAINTENANCE SERVICE PROVIDER CERTIFICATION PROGRAM

Ohio Revised Code Chapter 3718 provides authority to the Director of Health to approve sewage treatment system products and establish the requirements for the proper operation and maintenance of those products by registered service providers. Ohio Administrative Code Rule 3701-29-03 (C) sets forth the training and education requirements that a registered service provider must obtain in order to conduct servicing and maintenance on sewage treatment components and systems approved since January 1, 2007. The rule further establishes several options whereby service providers can demonstrate proof of education and/or training in order to service approved sewage treatment systems products and systems. Ohio Administrative Code Rule 3701-29-03 (C)(3)(b) authorizes the Director to approve other certification programs to meet these training requirements. Ohio Administrative Code Rule 3701-29-09 (I) also requires that sewage treatment systems owners demonstrate proof of maintenance of their system as part of their operation permit terms and conditions.

The National Onsite Wastewater Recycling Association, in conjunction with the Consortium of Institutes for Decentralized Wastewater Treatment has developed a National Operation and Maintenance Service Provider Training Program and has designated technical experts across the nation who is certified to conduct the training. The Ohio Department of Health has reviewed the curriculum for this training program and has determined that the scope and content of the program is adequate to ensure the proper maintenance and servicing of sewage treatment system products and components approved since January 1, 2007 as required under Ohio Administrative Code Chapter 3701-29, except for discharging sewage treatment systems installed under authorization of the General Household National Pollutant Discharge Elimination System (NPDES) permits issued by the Ohio Environmental Protection Agency. Approval of this alternative training program is necessary to ensure an adequate number of qualified service providers are available to sewage treatment system owners to easily and economically obtain service for their sewage treatment systems, and meet the rule and law requirements for demonstration of system maintenance.

I hereby approve the Consortium of Institutes for Decentralized Wastewater Treatment, National Operation and Maintenance Service Provider Training Program as an approved certification program for providing proof of compliance for sewage treatment system product training for pretreatment products approved after January 1, 2007.

7/22/15

Date

Richard Hodges MPA
Director of Health

The certificate holder has completed the CIDWT National O & M Service Provider Program and is approved by the Ohio Department of Health in accordance with rule 3701-29-03 (C)(3)(b) of the Ohio Administrative Code to provide service for any pretreatment component approved for use in Ohio that was not installed under the Ohio EPA Household Sewage Treatment Systems General NPDES Permit or covered as a part of a drip assurance package
