Notes:

- 1) Rates are shown per 100,000 persons and were calculated using census estimates for that year.
- 2) Total hepatitis equals all hepatitis B cases, both "acute" and "chronic".
- 3) Cases are included in Other race category if multiple races were chosen or if the case did not fit into any of the listed categories.

Small numbers are unstable and should be interpreted with caution.

Provisional data. Numbers subject to change as information is updated.

2020 data may not represent a true decline in incidence or cases of hepatitis B and may be a reporting artifact as a result of COVID-19.

Notes:

- 1) Rates are shown per 100,000 persons and were calculated using census estimates for that year.
- 2) Total hepatitis equals all hepatitis B cases, both "acute" and "chronic".
- 3) Cases diagnosed in state correctional facilities are excluded from individual county totals.

Small numbers are unstable and should be interpreted with caution.

Provisional data. Numbers subject to change as information is updated.

2020 data may not represent a true decline in incidence or cases of hepatitis B and may be a reporting artifact as a result of COVID-19.
