

## VACCINE BORROWING REPORT

- VFC providers are expected to manage and maintain an adequate inventory of vaccine for both their VFC and non-VFC-eligible patients.
- **Planned borrowing of VFC vaccine including the use of VFC vaccine as a replacement system for a provider's privately purchased vaccine inventory is not permissible. Borrowing vaccine should be rare and must be due to unforeseen delays with vaccine that was ordered.**
- VFC providers must ensure borrowing VFC vaccine will not prevent a VFC-eligible child from receiving a needed vaccination. Infrequent exchanging between VFC and private stock of a short-dated vaccine dose may be performed if the provider serves a small number of private pay patients, the dose is one month from expiration, or the dose of vaccine cannot be used for the population it is intended for prior to the expiration date.

### COMPLETE THIS FORM WHEN:
