Rates by county are shown per 100,000 population and were calculated using census estimates for that year. Rates by city for 2024 were calculated using 2023 census estimates due to lack of availability of city census data for 2024. 2020-2024 average rates were calculated by using the average number of cases and the average population from 2020-2024. Caution should be used when interpreting small numbers.
