Types of PAPI Providers

Full-pay Providers – Healthcare providers that agree to provide covered services to uninsured individuals and accept reimbursement from the state based on a fee schedule. These services are what is considered routine for PrEP-care and should never be billed to the client. If the client receives a service that is not covered by the PAPI program, the client will be responsible for the bill. Full-pay providers are also co-pay providers – they do not need a separate form.

Pharmacies – Pharmacy providers agree to dispense medication to insured clients without requesting payment and accept co-pay reimbursement from the state. If a client becomes uninsured, the client will be responsible for the payment. Only medication for PrEP will be covered by the program.

Co-pay Providers – Healthcare providers within a client’s insurance network that have agreed to accept co-pay reimbursement for services authorized by the PAPI program (office visits, approved labs). If a client’s insurance changes or the provider falls out of network, the client will be responsible for the payment. Additionally, if the client receives a service that is not covered by the program, the client will be responsible for the bill.
