

Ohio Cancer STATS & FACTS

Breast Cancer

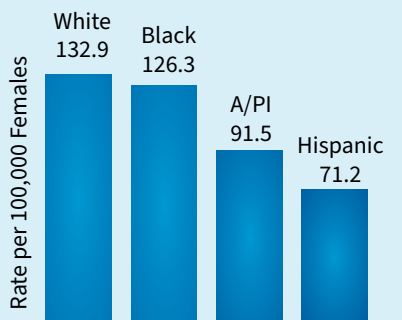

October 2024

Who Gets Breast Cancer?

On average, **10,071** cases of breast cancer were diagnosed among Ohio women each year during 2017-2021.

Rates of new breast cancer cases in Ohio were highest for **White women**, followed by Black, Asian/Pacific Islander (A/PI), and Hispanic women.

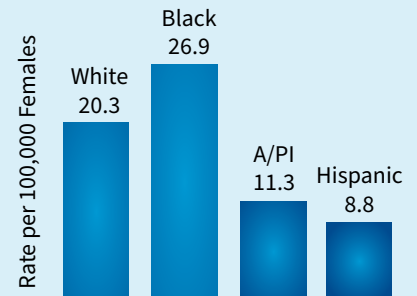

On average, 84 men were also diagnosed with breast cancer each year in Ohio in 2017-2021.

Breast Cancer Deaths

An average of **1,698** women died from breast cancer each year in Ohio during 2017-2021.

Breast cancer death rates in Ohio were highest for **Black women**, followed by White, Asian/Pacific Islander (A/PI), and Hispanic women.

Ohio female breast cancer death rates decreased 36% from 2000 to 2022.

Early Detection Is Important

Staging describes the extent or spread of cancer at the time of diagnosis and determines survival.

In Ohio in 2017-2021, **72%** of female breast cancers were diagnosed at an early stage.

In Ohio:

Nearly **100%** of women diagnosed with early-stage breast cancer that has not spread **SURVIVE FIVE YEARS** or more.

31% of women diagnosed with breast cancer that has spread (metastasized) to other parts of the body **SURVIVE FIVE YEARS** or more.

Get Screened for Breast Cancer

Regular mammograms can help find breast cancer early.

The U.S. Preventive Services Task Force (USPSTF) recommends mammography screening every two years for women **40-74 years old** who are at average risk.

In 2022, **75.6%** of Ohio women ages **50-74 years** reported having a mammogram in the past two years.

The Breast and Cervical Cancer Project offers no-cost breast and cervical cancer screenings and diagnostic testing to qualified participants.
